## Mathematics Curriculum Intent and Overview

To inspire the next generation to enjoy a deep understanding of mathematics and to become both independent and resilient learners who can apply their reasoning and problem-solving skills to life beyond De La Salle School.

| Focus | Intent |
| :--- | :--- |
| Mastery | To develop a deeper understanding of mathematics <br> which enables students to become fluent in <br> mathematics. |
| Challenge | To challenge and stretch students in every lesson. |
| Embedding knowledge | To develop students' retrieval skills to embed <br> cumulative knowledge. |
| Independent Learning | To develop students to become independent learners. |
| Problem Solving Skills | To develop reasoning and problem-solving skills to apply <br> their mathematical skills to solve real life problems. |
| Progress Tracking | To closely monitor and track student progress <br> throughout their five years at De La Salle School to <br> ensure every student makes at least expected progress. |
| Academic Achievement | To continuously improve on the examination success for <br> all our students. |
| Inspiration | To inspire the next generation of mathematicians to be <br> prepared for life beyond De La Salle School |

Curriculum outline: Years 7 and 8

|  | Autumn Term | Spring Term | Summer Term |
| :---: | :---: | :---: | :---: |
| 7 | - Sequences <br> - Algebraic notation <br> - Equality and equivalence <br> - Place value and ordering <br> - Fractions, decimals and percentage equivalence | - Solving problems with addition and subtraction <br> - Solving problems with multiplication and division <br> - Fractions and percentages of amounts <br> - Directed numbers <br> - Addition and subtraction of fractions | - Construction and measuring <br> - Geometric reasoning <br> - Developing number sense <br> - Sets and probability <br> - Prime numbers and proof |
| 8 | - Ratio and scale <br> - Multiplicative change <br> - Multiplying and dividing fractions <br> - Working in the Cartesian plane <br> - Representing data <br> - Tables and probability | - Brackets, equations and inequalities <br> - Sequences <br> - Indices <br> - Fractions and percentages <br> - Standard index form <br> - Number sense | - Angles in parallel lines and polygons <br> - Area of trapezia and circles <br> - Line symmetry and reflection <br> - The data handling cycle <br> - Measures of location |

## Curriculum outline: Years 9 and 10

| Year 9 | Autumn Term | Spring Term | Summer Term |
| :---: | :---: | :---: | :---: |
| Higher Sets 1 \& 2 | - Calculations and rounding <br> - Indices, roots and order of operations <br> - Factors, multiples and primes <br> - Standard form <br> - Algebra: The basics <br> - Equations <br> - Formulae | - Inequalities <br> - Sequences and drawing straightline graphs <br> - Averages and range <br> - Representing and interpreting data <br> - Fractions | - Percentages <br> - Ratio and proportion <br> - Probability 1 <br> - Perimeter, area and circles |
| Intermediate Sets 3 \& 4 | - Calculations and rounding <br> - Indices, roots and order of operations <br> - Factors, multiples and primes <br> - Standard form <br> - Algebra: The basics | - Equations <br> - Formulae <br> - Inequalities <br> - Sequences and drawing straightline graphs | - Averages and range <br> - Representing and interpreting data <br> - Fractions <br> - Percentages |
| Foundation Sets 5 \& 6 | - Integers and place value <br> - Decimals <br> - Indices, powers and roots <br> - Factors, multiples and primes <br> - Algebra: The basics | - Sequences <br> - Averages and range <br> - Representing and interpreting data | - Fractions <br> - Fractions, decimals and percentages <br> - Percentages 1 <br> - Properties of 2D shapes, parallel lines and angle facts |

| Year 10 | Autumn Term | Spring Term | Summer Term |
| :---: | :---: | :---: | :---: |
| Higher <br> Sets 1 \& 2 | - Volume and surface area <br> - Polygons and angles <br> - Transformations <br> - Scatter graphs <br> - Constructions, loci and bearings <br> - Pythagoras' Theorem and trigonometry <br> - Compound measures | - Real-life graphs and coordinate geometry <br> - Linear graphs <br> - Quadratic, cubic and other graphs <br> - Cones, spheres and pyramids <br> - Accuracy and bounds | - Solving quadratic and simultaneous equations <br> - Probability 2 <br> - Further trigonometry <br> - Collecting data, cumulative frequency, box plots and histograms |
| Intermediate Sets 3 \& 4 | - Ratio and proportion <br> - Probability <br> - Perimeter, area and circles | - Scatter graphs <br> - Constructions, loci and bearings <br> - Pythagoras' Theorem and trigonometry | - Compound measures <br> - Linear graphs <br> - Real-life graphs and coordinate geometry |

|  | - Volume and surface area <br> - Polygons and angles <br> - Transformations |  |  |
| :---: | :---: | :---: | :---: |
| Foundation Sets 5 \& 6 | - Perimeter and area <br> - 3D shapes, volume and surface area <br> - Probability 1 <br> - Ratio <br> - Proportion <br> - Equations | - Formulae <br> - Inequalities <br> - Transformations <br> - Circles <br> - Straight line graphs | - Real life graphs <br> - Scatter graphs <br> - Statistics and sampling <br> - Probability 2 <br> - Construction, loci and bearings |

| Year 11 | Autumn Term | Spring Term | Summer Term |
| :---: | :---: | :---: | :---: |
| Higher <br> Sets 1 \& 2 | - Circle theorems <br> - Surds <br> - Further algebra <br> - Direct and inverse proportion <br> - Similarity and congruence <br> - Functions | - Vectors and geometric proof <br> - Exponential functions <br> - Further graphs <br> - Transformations of functions <br> - Circle geometry | Exam preparation |
| Intermediate Sets 3 \& 4 | - Quadratic, cubic and reciprocal graphs <br> - Cones, spheres and pyramids <br> - Accuracy and bounds <br> - Solving quadratic and simultaneous equations <br> - Collecting data <br> - Similarity and congruence in 2D <br> - Vectors | Focused revision of topics identified from mini mocks and mock exams | Exam preparation |
| Foundation Sets 5 \& 6 | - Indices and standard form <br> - Percentages 2 <br> - Compound measures <br> - Angles in a polygon <br> - Similarity and congruence in 2D <br> - Pythagoras <br> - Vectors | - Quadratic, cubic and reciprocal graphs <br> - Quadratics: Expanding, factorising and solving <br> - Simultaneous equations <br> - Trigonometry | Exam preparation |

## Curriculum outline: Year 11 (old scheme of work)

|  | Autumn Term | Spring Term | Summer Term |
| :---: | :---: | :---: | :---: |
| Higher <br> Sets 1 \& 2 <br> (Adapted for Sets 3 \& 4) | - Solving quadratic equations <br> - Simultaneous equations <br> - Inequalities <br> - Congruent and similar shapes <br> - Further trigonometry <br> - Direct and inverse proportion <br> - Further algebra | - Circle theorems <br> - Algebraic fractions <br> - Quadratic and cubic functions <br> - Vectors and geometric proof <br> - Exponential functions and nonlinear graphs <br> - Graphs of trigonometric functions <br> - Transformations of graphs | Exam preparation |
| Foundation Sets 5 \& 6 | - Plans and elevations <br> - Construction and loci <br> - Vectors <br> - Fractions and reciprocals <br> - Indices and standard form <br> - Quadratics: Expanding, factorising and solving <br> - Cubic and reciprocal graphs <br> - Rearranging formulae <br> - Simultaneous equations | Focused revision of topics identified from mini mocks and mock exams | Exam preparation |
